

# 60% SAY NO TO MORE AIRPORT EXPANSION

## SO WHY IS THIS GOVERNMENT FLYING IN THE FACE OF PUBLIC OPINION?

An ICM poll this month shows 60% of the public want airport expansion to stop, because of its impact on climate change. So why won't this government listen?

When people want to fly, there's no shortage of choice. If anything, there's too much already. Why else would airlines be practically giving flights away?

Yet the government is encouraging the biggest expansion of airports the UK has ever seen. What for?

They tell us that aviation already accounts for 13% of UK CO2 emissions - 20% if you include return flights.

They ask us to take climate change seriously and save on energy and resources.

So why don't they?

Enough's enough. Tell Gordon to listen and stop wasting your carbon savings just to fly more planes that we don't want.

Send Gordon your copy of this ad at 10 Downing Street, London, SW1A 2AA. Or, e-mail him at [http://www.number-10.gov.uk/output/Email\\_The\\_PM\\_Form.asp](http://www.number-10.gov.uk/output/Email_The_PM_Form.asp)
